

INSTRUCTIONS FOR USE OF THE PRODUCT (GLASS SHOWER PARTITIONS):

1. Protect the product's glass from mechanical damage by sharp objects.
2. Do not place heavy objects on the installed product or exert strong physical force on it.
3. Adhesive films should not be affixed to the product's glass panes.
4. Clean the hinges, seals and glass panes with a glass cleaner. It should have a pH of between 4 and 10 – i.e., do not use strong acidic or alkaline cleaners.
5. Do not use microfibre cloths to clean the glass.
6. When not in use, leave the door open for ventilation.
7. Dry the glass with a soft cloth or glass wiper.

Products suitable for cleaning shower enclosures and screens:

- A rubber or polyurethane window wiper
- A soft synthetic sponge
- Liquid cleaning agents for cleaning windows and removing water deposits
- A solution of 5-10% citric or acetic acid

Not recommended for use in cleaning:

- Alkaline agents.
- Organic solvents (benzene, acetone, etc.).
- Formaldehyde.
- Formic or similar acids.
- Cleaning agents containing coarse particles.
- Cleaning agents containing dyes.

GLASS WIPER

- This elegant, chrome-plated wiper will keep your shower enclosure or screen looking immaculate.
- You won't need chemicals or cleaners to maintain your shower enclosure – the wiper with its silicone blade clings firmly to the glass and removes every drop.
- This tool is extremely functional: you don't even have to think about where to store the wiper, as it's safe and convenient to leave right on the edge of the glass or on the handle!
- If the silicone blade wears out, it can be easily replaced, so the wiper will enjoy a long life.
